

# Smarter Asset Management with Bidvest Mobility

## Take Control of Your Assets

Managing business assets should be simple, not overwhelming. Yet, many organisations still rely on outdated spreadsheets, manual tracking, and inefficient processes that cost time, money, and productivity. With Bidvest Mobility's asset management solution, you can finally take control of your entire asset lifecycle—ensuring visibility, accuracy, and accountability at every stage.

Our system is designed to streamline how businesses of all sizes manage their assets, from IT equipment cameras or scanners, medical supplies, and more. Whether you're tracking thousands of mobile devices or managing specialized equipment across multiple locations, our solution ensures your assets are always accounted for, in real time.

## Why Choose Bidvest Mobility?

With Bidvest Mobility, you don't just track assets—you optimize their usage, reduce losses, and empower your teams with tools that work for them. Our solution brings together automation, flexibility, and ease of use, giving you:

### Real-time visibility

into every asset, across every department.

### Automated Processes

that cut down on manual work and errors.

### Lower operational costs

through smarter inventory and lifecycle management.

### Full accountability

for staff handling business equipment and resources.

By moving away from outdated manual systems, you'll unlock faster, more efficient workflows while freeing up your team to focus on what truly matters—delivering value to your customers.

# Product Overview

AMS is a modern, cloud-based Asset Management Solution designed to help businesses track, allocate, and manage any kind of asset—whether fixed, operational, or utility-based.

From mobile scanners and forklifts in warehouses to desks and monitors in office buildings, AMS enables complete traceability, ultimately saving companies time and money.

## Allocate

Eliminate the chaos of spreadsheets

## Track

Have visibility over physical resources

## Manage

Improve accountability, efficiency, and costs

Total Assets

**1,248** +2.3%

From previous period

Faulty Assets

**37** 3%

Of total assets

Active Assets

**1,036** 83%

Of total assets

Allocated Assets

**842** 81%

Of active assets

## WHAT'S TO COME The Product Roadmap

### Inter-office Check-ins

Enabling operators to check assets in at any office within the company. Currently, assets need to be checked in at the office it was checked-out from.

### Mobile App

The mobile app will support RFID technology to enhance asset check-in/outs & room scanning to verify asset counts and locations, enhancing accuracy and reducing asset check-in/out times and queues.

### Automated Integrations

Enabling customers to integrate their systems with AMS. WhatsApp and Chatbot integrations are also on their way

### Asset Review Post Check-ins

Speed up the check-in process by separating the check-in and review process. First, check in all assets, then review the condition of the assets at a later stage.

### Asset Kits

Enable users to create asset kits that will speed up the check out/in process.

# WHAT DOES IT DO?

## The Core Features

**Allocate assets to users & operators**

**Manage asset conditions & availability**

**Bulk import/export asset and user data**

**Track asset allocation & incident history**

**Reporting & Analytics**

**Manage Users, Roles & System Locations**

## The Pricing Tiers

We understand that every business has unique needs. That's why Bidvest Mobility offers flexible pricing tiers designed to scale with you—whether you're a growing SME or a large enterprise.

No hidden costs. No complicated setups. Just a simple, transparent pricing model that ensures you only pay for what you need.
